6. Income Taxes

At September 30, 2013, and 2012, the Company had net deferred tax assets of $26,418, and $22,270, respectively. Due to uncertainties surrounding the Company's ability to generate future taxable income to realize these assets, a full valuation allowance has been established to offset the net deferred tax asset.

The provision for income tax consists of the following components at September 30, 2013 and 2012:

	2013	2012
Current:		
Federal income taxes	$ --	$ --
State income taxes	--	--
Deferred	--	--
	$ --	$ --

The following reconciles income taxes reported in the financial statements to taxes that would be obtained by applying regular tax rates to income before taxes:

	2013	2012
Expected tax benefit using regular rates	$ (4,148)	$ (4,239)
State minimum tax	--	--
Valuation allowance	4,148	4,239
Tax Provision	$ --	$ --

The Company has loss carry forwards totaling $77,701 that may be offset against future federal income taxes. If not used, the carry forwards will expire between 2021 and 2033.

As a result of the implementation of certain provisions of ASC 740, Income Taxes, (formerly FIN 48, Accounting for Uncertainty in Income Taxes – An Interpretation of FASB Statement No. 109), the Company performed an analysis of its previous tax filings and determined that there were no positions taken that it considered uncertain. Therefore, there was no provision for uncertain tax positions for the years ended September 30, 2013 and 2012. Future changes in uncertain tax positions are not expected to have an impact on the effective tax rate due to the existence of the valuation allowance. The Company will continue to classify income tax penalties and interest, if any, as part of interest and other expenses in its statements of operations. The Company has incurred no interest or penalties as of September 30, 2013 and 2012.
